

SHOULD I REPORT TO SCHOOL?

Stay at home and isolate for 10 days from your positive test date. You must be fever free for 24 hours without the use of fever reducing medication before returning to school, and symptoms improving.

A note from your Physician or the Department of Health must be provided to return to school.

Stay at home for a minimum of 10 days (14 is recommended), after the last exposure to the positive case of Covid-19, AND monitor for symptoms taking temperature twice a day for a minimum of 14 days. (If at any point your child's temperature is 100.0 or higher, or your child starts developing symptoms, contact your healthcare provider AND your building nurse.)

May return to school after 10 days, if no symptoms develop.

Either a note from the physician, or a parent note is required, or you may complete our online symptom monitoring form, stating the child has not developed symptoms during quarantine.

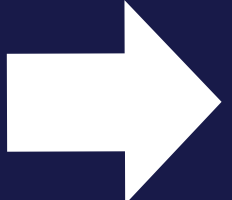

OR

If the child has tested negative on or after day 5, during quarantine, AND has no symptoms, they may return to school on or after day 8.

Either a note from the physician, or a parent note is required, or you may complete our online symptom monitoring form, stating the child has not developed symptoms during quarantine.

Return to school, but monitor for signs and symptoms up to 14 days. If symptoms develop, quarantine at least 14 days from the onset of symptoms AND until fever free for 24 hours without the use of fever reducing medication.

Please visit our Covid-19 informational website for the symptom monitoring form, the positive case form, and news or announcements regarding the current Covid-19 situation in our district.

STAYING SAFE TOGETHER
